2nd Grade studies the Rain Forest

Mrs. Cross' second grade class made individual terrariums to aid in the study of the rain forest. This project helps the students, who are becoming rain forest advocates, study the layers, weather, and water cycle in a tropical rain forest. Each student was able to put in an "emergent", "canopy", and "understory" layer in their individual rain forest.

Mrs. Cross' second grade would like to say a **HUGE THANK YOU to Ray's Food Place**, for the donation of 3 tropical plants per student.

Barnes Butte Families,

These final weeks will be the capstone to a fantastic first year at Barnes Butte Elementary. There will be an emphasis placed on positive relationships which has been a very important focus of mine this year with the whole staff. For any significant learning to occur, there must first be a positive connection. I am so proud of the staff and students. Everywhere I go the kids are regularly polite and safe. When they are not, it's a chance to teach that expectation. This is what I hope for your school. While I am your principal, I'll work diligently for every child to feel safe and confident with their experience in kindergarten through fifth grade. Clearly, though that this task cannot happen with my commitment alone. It will take all of us and committed to doing so in all places. It will take being patient and careful in the parking lot at the beginning of the day and the departure times. It will require each staff member to make the most of every moment at school and I believe that message is clear because I see examples of it every day. It will continue to develop as you talk positively with your students about doing their part at school. Simply put, Barnes Butte will be a place we are proud of if we have a picture in our mind

of what we want in a school and commit to that every day. I hope to see you over these next weeks.

Your Principal – Jim Bates
